# Maintenance

Maintenance

# Annual system check

The steady performance of your equipment is essential to your business success. Our BST service technicians provide you with extensive expertise to ensure that your system runs smoothly and is ready for operation at all times.

Preventive system maintenance forms the foundation for sustained system availability.

Our specialists handle the maintenance of the system and provide targeted training for system usage. Our service visits are designed to ensure the optimal performance of your systems.

BST service technicians replace worn parts in a timely manner and perform routine maintenance for upkeep.

**Performance improvement through optimization and training**

**Improvement of the availability of the system through preventive replacement of wear parts**

**New functions and bug fixes through software updates**

**Spare parts recommendation by Fieldservice employees**
